

Covers

A variety of covers are available for UEA slip rings in several bore sizes. UEA engineers can assist customers by recommending material, size and shape and by designing covers for customized slip ring applications.

Spun Aluminum

Tightest UEA cover, not recommended if condensation could occur. NEMA 4 rated.

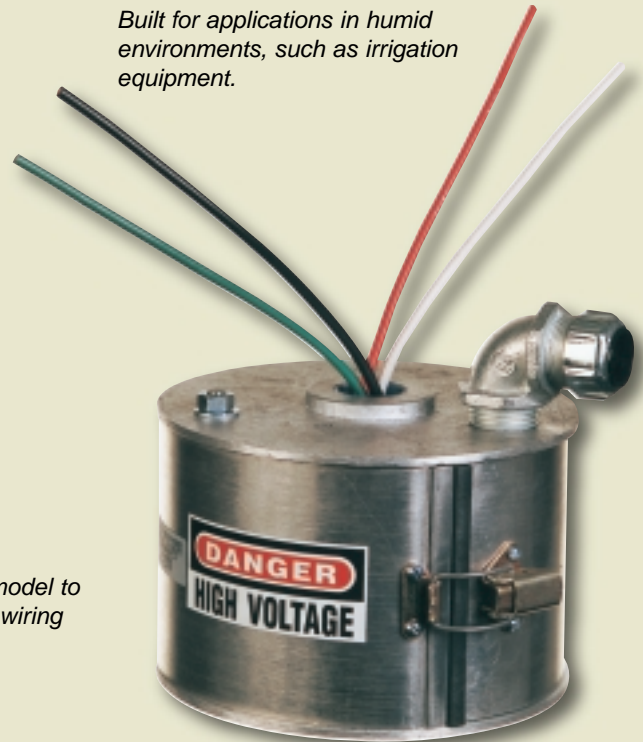

Dome Aluminum

Built for applications in humid environments, such as irrigation equipment.

PVC (2.5" - 4" and 6" - 8" Bores)

Accommodates large diameter rings.

Wrap-around Aluminum

Easy brush access when space above and below ring is restricted. Available for all bore sizes.

Large Diameter

For use in 1.50" bore model to allow for more internal wiring space.
